

# José Alexandre Pereira

## Data Analytics

As a Data Analyst I look for a way to improve the efficiency of a company with the understanding of data. My education background on Biology let me be a plastic person who can adapt to different situations and growth with the stimuli from the environment I'm placed on. I can bring my scientific view to different fields and enforce a sustainable growth for the company and the people. As I love to learn new things I like to work with people with different views and a sharing mindset.

## EDUCATION

### Data Analytics Bootcamp Ironhack

01/2020 – 03/2020

#### Courses

- Machine Learning
- Statistics
- Exploratory Data Analysis
- Web Scrapping

### Degree in Biology

Faculdade de Ciências da Universidade de Lisboa

#### Courses

- Ecology
- Biotechnology
- BioInformatics

Lisbon

## SKILLS

Python

MySQL

Machine Learning

Pandas

Scrum

Excel

Data Visualisation

## PERSONAL PROJECTS

### Final Project

The Impact of GHG on Animal Kingdoms  
(03/2020 – 03/2020)

- GHG Emission by different Countries
- Biodiversity Analysis and Observed Species in Countries with different GHG Emissions

Facilities in Lisbon and the impact on work  
force (02/2020 – 02/2020)

- Difeferent impactful facilities
